

KRISH NAGRANI

Generative AI Developer • LLM Applications • AI Workflow Automation

Surrey, BC • 604-401-7761 • krishnagrani@hotmail.com • [linkedin.com/in/krish-nagrani-31b189380](https://www.linkedin.com/in/krish-nagrani-31b189380)

PROFESSIONAL SUMMARY

Applied AI developer and Computer Science student at Simon Fraser University with hands-on experience building real-world Generative AI systems. Designed and deployed a fully automated AI content production pipeline — integrating LLMs, voice synthesis, AI avatars, AI music, and visual generation — that scaled a YouTube channel to 14,000+ subscribers and 1M+ views within one month. Proficient in prompt engineering, Python, and ML fundamentals including regression and classification. Experienced with Anthropic Claude, OpenAI, and a broad ecosystem of generative AI tools. Certified in Building with Claude Code by Anthropic.

KEY ACHIEVEMENTS

 Production AI System Built from Scratch Designed a fully automated AI pipeline integrating LLMs, voice synthesis, AI avatars, AI music, and visual generation — end-to-end, zero manual intervention.	 14,000+ Subscribers in Under One Month Scaled a YouTube channel from zero using the AI automated workflow — reaching 1M+ views and YouTube monetization faster than most human-edited channels.
 News Portal Founder & AI Content Producer Founded journalism.net.in and built an AI-assisted content pipeline managing production and distribution across multiple platforms simultaneously.	 3x National Mental Math Champion UCMAS Canada Champion 2013–2015. Solved 100 arithmetic problems in 8 minutes with 100% accuracy — analytical precision directly transferable to ML evaluation.

AI PROJECTS

Automated AI Content Production System | Self-Directed Project 2024 – Present • Surrey, BC

- Architected a fully automated end-to-end AI pipeline integrating LLMs (Claude, GPT), voice synthesis, AI avatar generation, AI music composition, and AI visual generation into a single orchestrated production workflow
- Engineered prompt engineering workflows to generate unique, platform-optimized content for YouTube, Instagram, Facebook, and TikTok — tailored to each platform's algorithm and format requirements
- Implemented batch processing to simultaneously produce and schedule multiple videos across platforms, scaling content output velocity by 70%+ with no manual re-editing
- Leveraged Anthropic Claude, OpenAI GPT, DALL-E, and specialized voice and music generation models together in a unified production system
- Delivered measurable, production-scale results: 14,000+ subscribers, 1M+ views, and YouTube monetization achieved in under 30 days — a live proof-of-concept for LLM-powered automation

EXPERIENCE

Media & AI Production Intern | Journalism News Network Oct 2025 – Present • Remote

- Apply AI-assisted workflows to produce and publish content at journalism.net.in, integrating generative AI tools for article formatting, media generation, and cross-platform distribution
- Manage automated content publishing across web, social, and news aggregator platforms — maintaining consistent output under news-cycle deadlines
- Leverage prompt engineering techniques to generate editorial content at scale while preserving accuracy and journalistic quality
- Operate and maintain the AINewsPulse Facebook page (5,000+ followers) by repurposing AI-generated content for platform-specific formats

TECHNICAL SKILLS

AI / GenAI: Anthropic Claude · Claude Code · OpenAI API · GPT Models · DALL-E · Prompt Engineering · LLM application development

AI Media Generation: Voice synthesis · AI avatar generation · AI music composition · AI visual generation · Multi-modal AI pipelines

Machine Learning: Regression · Classification · Python (Pandas, Scikit-learn) · ML model evaluation · Data analysis

Programming: Python · Git · Scripting and automation · JSON/XML

Platforms & Tools: YouTube · Facebook · Instagram · TikTok — platform algorithm knowledge, content optimization, and growth strategy

Soft Skills: Self-directed builder · Fast learner · Strong communicator · Detail-oriented · Bilingual (English, Hindi)

EDUCATION

Bachelor of Science — Computer Software Engineering | [Simon Fraser University](#) 2023 – 2028 • Burnaby, BC

- Focus: Applied Artificial Intelligence, Generative AI systems, Machine Learning, and Software Engineering
- Relevant coursework: Regression & Classification (Python, Pandas, Scikit-learn), AI tooling, software development methodologies

CERTIFICATIONS & RECOGNITION

Building With Claude Code — Anthropic | May 2026

UCMAS National Mental Math Champion (3x Consecutive) — UCMAS Canada | 2013–2015

Featured in Times of India for achieving 100% accuracy across 100 mental arithmetic problems in 8 minutes.
